

The Texas Taxidermy Association, Inc. is an education driven group whose goal is to provide the best resources and experienced professionals to guide the next generation of taxidermists into the future of the industry.

This includes teaching our members high quality taxidermy techniques, business management, and best practices regarding conservation, educating customers on the local laws and cooperating with multiple other wildlife authorities regarding hunting and wildlife management.

We aim to protect our livelihood and hone our craft by recreating the splendor of nature by working hand in hand with other taxidermists, clients, and family members to protect hunting rights for not only our generation, but future generations to come.
